PROFESSIONAL SUMMARY

Cloud Computing enthusiast (BCA student) with hands-on AWS experience — event-driven serverless pipelines (Lambda, SQS, DynamoDB) and containerized microservices on ECS Fargate with auto-scaling and monitoring. Skilled in IAM least privilege, VPC networking, and Infrastructure as Code (SAM/CloudFormation). Seeking an entry-level Cloud/DevOps role to apply project-tested AWS skills.

EDUCATION

United University Sep 2024 – Present
Bachelor of Computer Applications (BCA) — CGPA: 7.26 / 10

Mata Prasad Adarsh Inter College, Jaunpur Apr 2022 – Apr 2023
12th (PCM - Physics, Chemistry, Mathematics)

TECHNICAL SKILLS

Cloud (AWS):	Lambda, ECS Fargate, S3, DynamoDB, API Gateway, SQS, SNS, VPC, IAM, ALB, ECR, CloudWatch, SAM, CloudFormation, Rekognition
OS & Networking:	Linux, Windows | TCP/IP, DNS, HTTP/HTTPS, Subnetting, CIDR, Routing, Security Groups
Programming & Data:	Python, FastAPI, Boto3, JavaScript | SQL, MySQL
DevOps & IaC:	Docker (multi-stage, non-root), Git, GitHub, Infrastructure as Code (IaC), cfn-lint, Unit Testing with Mocked AWS Services

PROJECTS

Event-Driven Image Labeling Pipeline *| AWS: S3, SQS, Lambda, Rekognition, DynamoDB, SAM [github.com/Priyanshzx/image-label-pipeline]*

- Designed & deployed a serverless, event-driven pipeline that automatically detects and labels image content using AWS Rekognition.
- Decoupled upload from processing using SQS with a dead-letter queue (DLQ) and partial-batch-failure handling to isolate and retry failed items.
- Exposed results via a REST API (API Gateway + Lambda, backed by DynamoDB); defined IaC with AWS SAM/CloudFormation, validated with cfn-lint, and verified behavior with automated unit tests using mocked AWS services.

Containerized Task Tracker API *| AWS: ECS Fargate, ALB, DynamoDB, ECR, VPC [github.com/Priyanshzx/task-tracker]*

- Built and deployed a containerized FastAPI microservice (Docker multi-stage build, non-root user) on ECS Fargate behind an Application Load Balancer.
- Configured VPC networking & security groups from scratch and split least-privilege IAM across separate Task Execution and Task Roles.
- Set up CPU-based auto-scaling and CloudWatch dashboard with SNS alarm notifications for high CPU and unhealthy hosts, with test coverage across success, 404, and failure-simulation cases.

Image Labels Generator *| Python, AWS S3, Amazon Rekognition, Boto3, Pillow, Matplotlib*

- Built a Python tool that analyzes images stored in Amazon S3 using the Amazon Rekognition DetectLabels API, generating object/scene labels with confidence scores.
- Configured AWS CLI and IAM permissions to securely authenticate requests, using Boto3 for integration and Pillow/Matplotlib to display labeled images.

CERTIFICATIONS & TRAINING

• AWS Cloud Practitioner Essentials • AWS Cloud Quest: Cloud Practitioner - Training Badge
• AWS Cloud Essentials Training Badge • Introduction to Generative AI - Art of the Possible
• Fundamentals of Machine Learning and AI • Essentials of Prompt Engineering

LANGUAGES & SOFT SKILLS

Languages: English (Professional Working Proficiency) | Hindi (Native Proficiency)
Soft Skills: Problem Solving • Communication • Adaptability • Resourcefulness • Time Management • Composure • Curiosity
